DMITRY SHAMAL

Senior Frontend Developer

Saint Petersburg, Russia | digr98@gmail.com | Telegram: @no_sugar_daddy

PROFILE

Frontend developer with 7+ years of commercial experience. Specializing in React, TypeScript and complex interface architecture. I build web applications and Telegram Mini Apps, from marketplaces and trading products to gaming platforms. I create products from scratch, evolve existing systems and review code. I use AI tools (Claude Code and OpenAI Codex) to analyze code, identify bottlenecks and fix bugs.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React, Next.js, Vite, HTML5, CSS3, SCSS, CSS Modules, Tailwind CSS

State and data: Zustand, Redux Toolkit, TanStack Query, REST API

Architecture and UI: component architecture, UI Kit, Storybook, mobile-first development

Backend: NestJS, PostgreSQL (basic knowledge), Go (reading and understanding code)

Web3 and Telegram: Telegram Mini Apps, TON, TonConnect, NFT, smart contract integration

AI tools: Claude Code, OpenAI Codex (code analysis, bottleneck identification, bug fixes and small features); Pen.dev (interface design)

Infrastructure: Git, GitHub, Vercel, DigitalOcean App Platform

PROFESSIONAL EXPERIENCE

Open Builders - Senior Frontend Developer

May 2024 - Present

Developed Telegram Mini Apps for a large audience. Depending on the project, acted as frontend technical lead or sole frontend developer, owning architecture, implementation and ongoing product development.

- Initiated and built a React/TypeScript UI Kit with reusable components, theming, Storybook and npm distribution; introduced it into Collab Tool. GitHub | Collab Tool
- Independently built the frontend of several applications from scratch, including architecture, interfaces and state management. Moved selected logic to the client to reduce server load in high-traffic products.
- Reviewed code and technical decisions; collaborated on large products under tight deadlines.
- Reworked applications as business models changed; integrated TON, wallets and smart contracts.
- Built the Telegram Tools ecosystem landing page. GitHub

DMITRY SHAMAL

Senior Frontend Developer | Selected projects and earlier experience

OPEN BUILDERS - SELECTED PROJECTS

- **Sticker Pack:** a marketplace for limited-edition digital sticker packs issued as NFTs on TON. Evolved and reworked collection launches, sales mechanics, purchases, transfers and minting, including direct TON interactions without a backend API. Telegram
- **Not Games:** a Telegram gaming platform from the creators of Notcoin, with a shared player profile, achievements, inventory and marketplace. Worked on achievements, items, marketplace features and profile customization. Telegram
- **Void Game:** a multiplayer game on Not Games. Became the sole frontend developer after the team left; continued development, refined game mechanics and launched a new season. Telegram
- **Access Tool:** an open-source service controlling access to private Telegram groups and channels through digital assets. Independently built the entire frontend. Telegram | GitHub
- **Earn:** an application for token distribution campaigns. Independently built the entire frontend. Telegram
- **Community:** a task and campaign platform connecting projects and users in Telegram and TON. Added new task types, paid tasks, navigation and filtering, and redesigned the interface.

ORCA.codes - Middle Frontend Developer (part-time)

November 2023 - March 2024

- Built the interfaces and product functionality of a dental equipment marketplace from scratch.

PIK Digital - Middle Frontend Developer

May 2021 - May 2024

- Contributed to the pik.ru redesign and expanded customer tools for choosing and buying an apartment, including an interactive property map with search and filters.
- Updated the online mortgage calculator to support new subsidized interest rates and purchase terms.
- Configured server-side rendering (SSR) and improved technical SEO, helping the website reach and maintain a top-3 position for target search queries.
- Extracted shared business logic into microservices for reuse across multiple parts of the platform.

GELSTER - Web Developer

July 2019 - May 2021

- Independently built the corporate website and an application for automating commercial proposals; maintained internal web tools.
